Music for Video Games

Dynamic, genre-spanning music specifically written for video games, TV programmes, films and commercials.

Loft Music specialises in writing, selecting and producing music. We work with a number of high profile clients such as Channel 4, BBC and Warner Brothers, and on programmes such as CSI and The Sopranos providing them with sync licenses.

Specifically on the video games front, our music has been used by a wide number of publishers including EA, Infogrames, Sega, Sony and Ubisoft.

Video games clients include:

Electronic Arts

Nintendo

Playstation

Sega

Sony

Ubisoft.

Other clients include:

BBC

CBS Television Network

Channel 4

Global Underground

Nike Motionworks

Warner Brothers.

Inspiring music from a growing stable of new and established global artists and writers

SERVICE

We offer a very flexible service to clients: we can supply existing tracks or edit/adapt tracks to fit your video game dynamic, or alternatively we can write original music specifically to your video game brief.

GENRE

The style of music available from Loft Music is wide ranging from electronic folk to rock to orchestral pieces. Much of the music in our back catalogue has been originally written for commercial release - eg from an album/release. For this reason we believe our music stands out in terms of quality and authenticity; the drive behind it is always genuine.

WRITERS

We continue to build our collective of writers, all of whom have extensive experience of scoring music to brief, examples being the soundtracks to Tomb Raider III, IV, V & VI, and have included collaborations with musicians ranging from the Sigur Rós live band to the full London Symphony Orchestra. Most recently Loft Music wrote and produced a fifty minute original soundtrack for a brand new game IP for Ubisoft.

PRODUCTION

As well as having worked at Abbey Road with the London Symphony Orchestra, Loft's writers currently compose in a state of the art SSL based recording studio equipped with studio hardware from leading names in the industry such as Solid State Logic, Crane Song, Brauner, DW Fearn, Chandler, Soundelux and Royer, instrumentation from Nord, Access and Roland, plus a range of high-end software. Using a mixture of live performance and cutting edge technology we are able to create a unique sound whatever the challenge of the brief.

LICENSING

All of our music is available for immediate license. In terms of ownership, Loft either owns all music rights for the world or if not we have very close ties with the relevant labels and publishers, making licensing a seamless process. All tracks are also PRS registered in the UK.

CONTACT US

If you feel like talking further please email us/call us for a chat about your specific video games music requirements.

Sample Tracks

Please click on the tracks to the right to listen to a sample of our work.

-  LOFT | Main Theme
